

# 22 Series Mulch Finishers

MF2204 • MF2206 • MF2208

# The quick, simple solution for proper seedbed preparation.

From tilling hard, layered soil to preparing existing food plots for reseeding, the 22 Series Mulch Finishers are designed for versatility and performance.

Choose from three affordable models: MF2204, MF2206, and MF2208. Designed for tractors from 30 to 100 horsepower (22-75 kw), the 22 Series Mulch Finishers come with 6, 8, or 12 disk blades. They provide excellent residue management and can help you achieve uniform tillage depth using any one of three distinct ground-engaging options.

Our standard 9-inch (22.9 cm) Sweeps lift the soil and spread it evenly for a smooth, level seedbed.

Our durable Chisel Spikes (optional) let you till and break up compacted soil in no time at all. And because the spikes pull through soil with less draft, you'll conserve fuel over each pass, reducing costs. Reversible tips give your spikes longer life.

The optional Turning Tips offer greater ground penetration through heavy residue, grass, or tough ground cover and break up soil compaction while turning over soil to bury residue.

The Frontier Mulch Finishers are sold and supported by John Deere, the most trusted name in farm, ranch and lawn equipment. To help you choose the right Frontier Mulch Finisher, talk to your local John Deere dealer, your exclusive source of Frontier Equipment.

## Details

As an additional option, attach the Rolling Basket (left) to the Frontier Mulch Finisher to till, condition, and level...all in a single pass! Designed to give you a smooth planting-ready seedbed each time. The efficiency saves time and money in your tilling operation while increasing planting productivity.
